

Crowd Coin

Making Crypto Easy...

01. WHY BOTHER ?

In today's fast pace crypto world, people without enough free time, technical background and computer knowledge are facing great difficulty catching up to the latest crypto trends.

Can you afford to miss out?

— of course **not.**
That's where we come in.

02. WHY CROWDCOIN?

Because we like to keep it simple.

THINK OF CROWDCOIN AS YOUR ONE-STOP PLATFORM TO THE WORLD OF CRYPTOCURRENCIES. AN EASY AND COMPREHENSIVE ECOSYSTEM FOR LEARNING EVERYTHING ABOUT CRYPTO THROUGH WRITTEN AND VISUAL TUTORIALS, KEEPING YOU UP TO DATE WITH THE MARKET TRENDS, ICOS AND TOOLS FOR REAL TIME INVESTING, EXCHANGING, OR PAYING FOR GOODS AND SERVICES. ALL THIS THROUGH OUR STATE OF THE ART PLATFORM.

WHO ARE WE?

CrowdCoin is an open source community-driven coin. In other words, the coin was developed by an initial team of people who made sure that it is stable and it fulfills all Blockchain requirements. Now CrowdCoin is all of us including you.

ALL OF US? WHAT DO YOU MEAN?

The CrowdCoin team is not fixed. It is expanding everyday from the people in its community. Special bounties and rewards are given to those who can contribute in any aspect for the future of the coin.

Get involved!

**WHAT IS YOUR EXPERTISE?
LET THE COMMUNITY KNOW
AND MAKE A DIFFERENCE.**

We are so many with so many talents.
Can you imagine how far we can go?

CrowdCoin is the coin of the people.

03. THE PLATFORM

Our unique and secure platform will house your wallet and your portfolio as well as give you all the tools and information required to research and make investments.

DUE DILIGENCE & FUND INVESTING

An in-depth analysis of new start-ups and crypto investments will be available to everyone in order to take action and invest using CrowdCoin as primary method of payment.

New startup companies (approved by our expert staff) wanting to raise funds will be offered the opportunity to do so on our platform. In return for that service, any profit received from those startup companies will be distributed to the original investors with the appropriate amount of Crowdcoin, giving our users a wide range of secure investment opportunities.

EDUCATION & TUTORIALS

Step by step tutorials and videos will be available to everyone to learn or improve upon their knowledge of crypto. All the material will be categorized in such a manner that whether you are a beginner or advanced in crypto you will be able to find what you are looking for.

NEWS & MARKET TRENDS

Our expert community members will address daily crypto trends and news, keeping everyone up to date with independent analyses, carefully selected news articles* and social media updates.

*Selection criteria: objective, non-bias, no ads and/or paid releases

EXCHANGE

A fully functioning multi-cryptocurrency exchange platform will be available to our users, so they can invest, trade and exchange currencies at any given time without having to seek out third parties, thus eliminating excess registration, login credential management and transfer fees we usually see when trying to purchase various cryptocurrencies through exchanges.

04. WHY INVEST IN CROWDCOIN?

You might be wondering what makes CrowdCoin so special and why so many people are interested in it. Well, here it is.

Unique Blockchain

CrowdCoin is a unique Proof of Work based cryptocurrency forked from Dash with its own blockchain built from the ground up.

In addition to that CrowdCoin is utilizing **masternodes** to provide added stability, flexibility and security to the coin's network, and the added masternode governance system allowing masternode owners to take votes on the future progression of CrowdCoin.

What is a Masternode?

CrowdCoin masternodes are computers that run a CrowdCoin wallet 24 hours a day, keeping the network steady and secure by locking transactions with InstantSend, coordinating mixing of coins, and voting on budget funding.

Masternodes are owned by different people in CrowdCoin's community and they only require a 1000 CrowdCoin collateral, a dedicated IP address, and continuous uptime. Masternode owners get half of the block reward distributed in a fair random manner between all the active masternodes.

CAN ANYONE OWN A CROWDCOIN MASTERNODE?

Of course! All you need is to purchase **1000 CrowdCoin** from one the exchanges that offers CRC pairs, everything else will be explained in great detail in our written masternode setup guides on the website, if you get stuck on any part of the guide drop by in **our Discord** and the community will help you with any issues you might have.

05. Transparency

**ALL INVESTORS SEEK
TRANSPARENCY; TO KNOW
WHO IS BEHIND THEIR
POTENTIAL INVESTMENT.
NAMES AND FACES.**

This is what we have here at CrowdCoin. The Developer, members of the core team, support team and task managers are available to everyone and ready to help. We are all part of the everyday work involving the community and Social Media, we are available to provide support and answer any questions you might have at any given time.

Strong Com- munity

CrowdCoin has capable community members in our Discord channel on FaceBook and on Twitter all willing to help new members, constantly contributing to the coin's success. Everyone in our community has a different background therefore contributes in tasks and projects that are needed for the coin's future success in whatever way they can.

You can find us here:

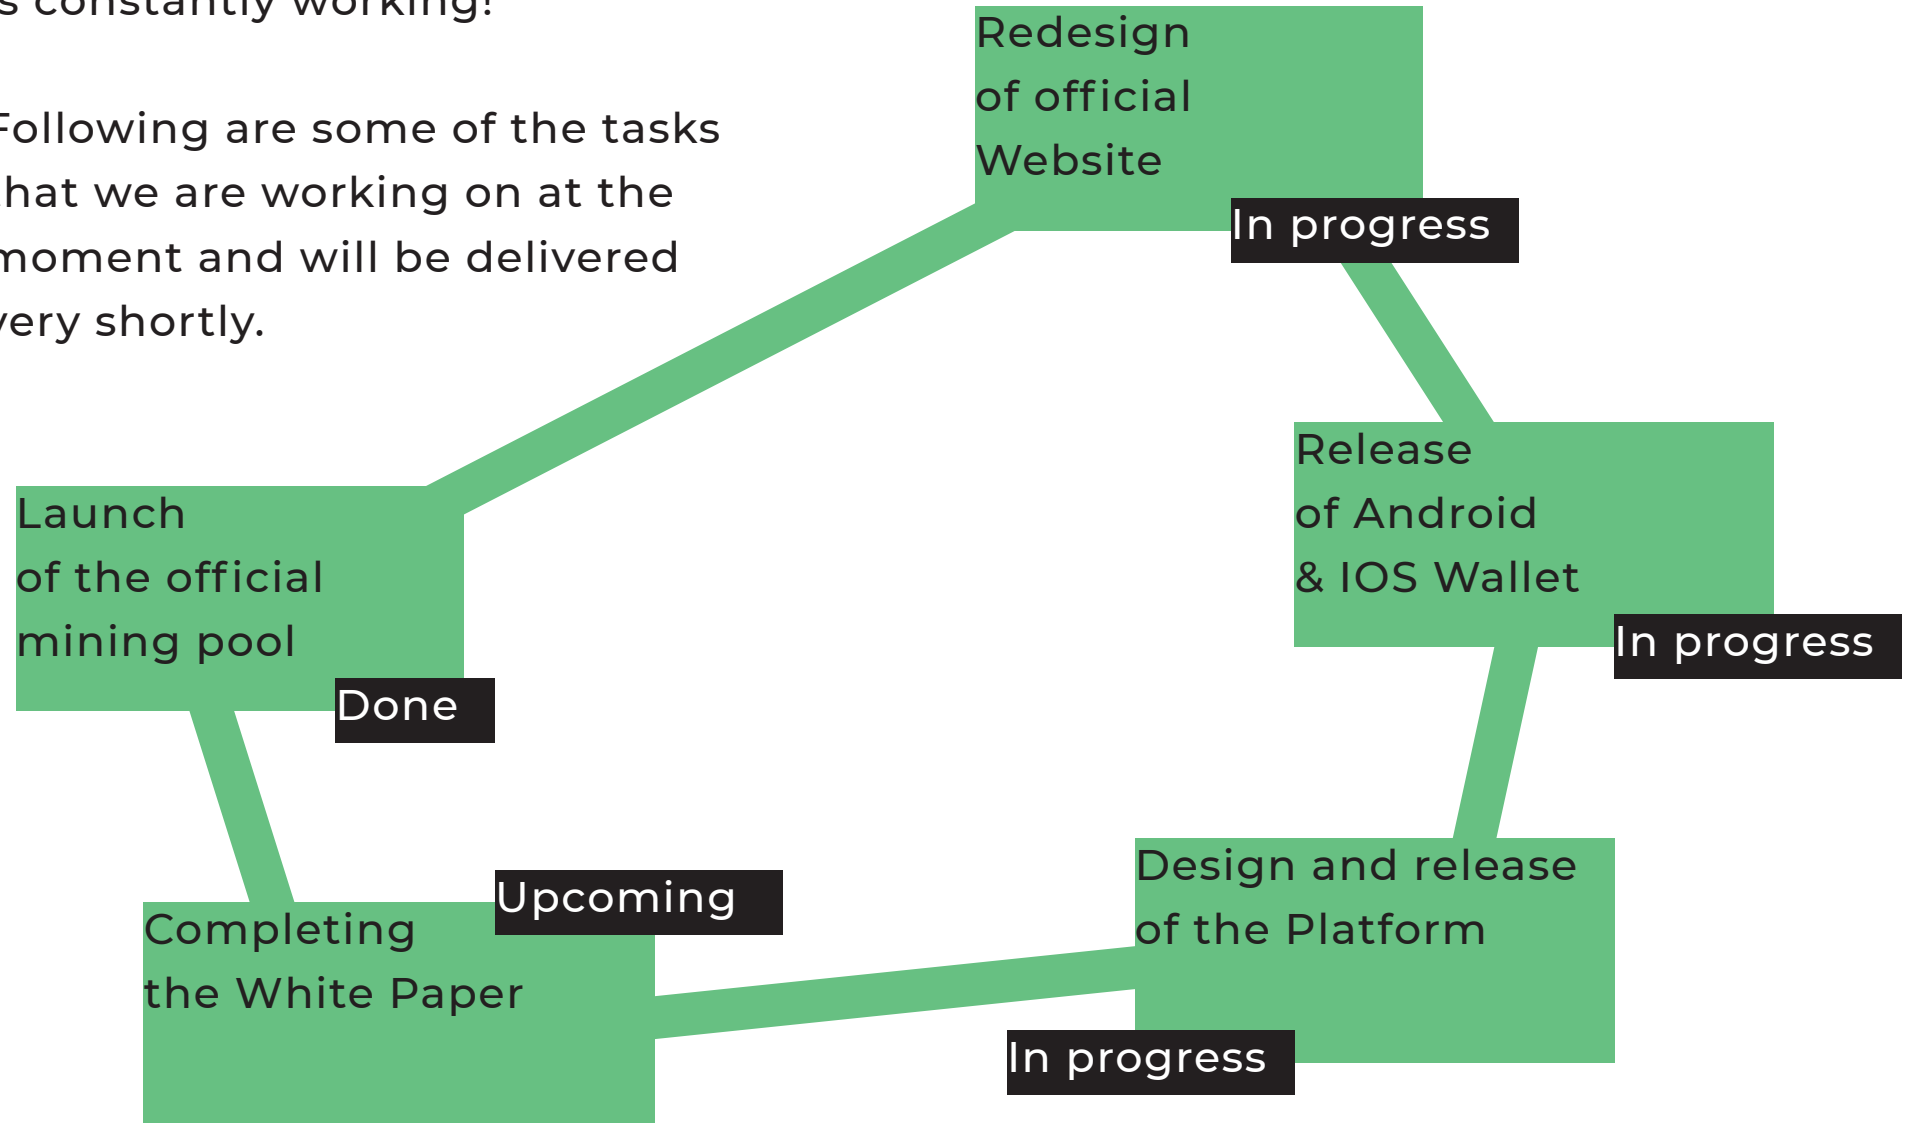

Discord channel

WHAT'S NEXT?

Our team and community is constantly working!

Following are some of the tasks that we are working on at the moment and will be delivered very shortly.

WHAT ARE CRYPTOCURRENCIES?

Cryptocurrencies are a form of digital or virtual currencies that are encrypted (secured) using cryptography. Cryptography refers to the use of encryption techniques to secure and verify the transfer of transactions. Bitcoin represents the first decentralized cryptocurrency, which is powered by a public ledger that records and validates all transactions chronologically, called the Blockchain, or distributed ledger.

WHAT ARE TOKENS?

Tokens are a representation of a particular asset or utility, that usually resides on top of another blockchain. Creating tokens is a much easier process as you do not have to modify the code from a particular protocol or create a blockchain from scratch. All you have to do is follow a standard template on the blockchain – such as on the Ethereum or Waves platform – that allows you to create your own tokens. This functionality of creating your own tokens is made possible through the use of smart contracts; programmable computer codes that are self-executing and do not need any third-parties to operate.

WHAT IS PROOF OF WORK (POW)?

Proof of Work is a requirement to define extensive computer calculations, also called mining, that need to be performed in order to create a new group of transactions (the so-called blocks) on a distributed ledger called blockchain using either regular computer hardware or ASICs (Application Specific Integrated Circuits). This process is very electricity intensive and is part of what gives cryptocurrencies intrinsic value.

PoW has 2 purposes:

1. To verify the legitimacy of a transaction, or avoiding the so-called double-spending;
2. To create new digital currencies by rewarding miners for performing the previous task.

What are the steps to invest in Crypto?

STEP#1

Do your research and pick a coin with the following characteristics:

- Good concept
- Strong team
- Transparency
- Long term use

STEP#2

Look for the coin's links to website, announcement and chat on coinmarketcap.com as well as the price graphs.

STEP#3

Check which exchanges offer this coin.

STEP#4

Create an account with the exchange.

STEP#5

Pick an entry price based on the market and the coin's news. This will be your personal speculation.

STEP#6

Always have a roof and a floor price in mind, which means selling at a higher price for profit, but also have an exit price in mind to sell at a lower price than you bought, to protect your investment in times of big volatility.

STEP#7

Enjoy the ride and don't invest more than you can afford.
